SUMMARY

I made a move to Software Engineering in 2018 from the Real Estate industry, and it has been refreshing to experience work that I am passionate about. I am an alumni of Holberton School, a Full-Stack software engineering program. My focus are fundamentals and algorithms to be able to pick up new technologies quickly. Strong experience with troubleshooting and solving problems with a focused mindset to break down problems. Currently, I am a contract software engineer at Fexy Media.

TECHNICAL SKILLS

PROGRAMMING LANGUAGES

Python, C, Bash, SQL

OTHERS

Linux, Git, Docker

PROJECTS

Mycroft AI - Skill Time Tracker (06/19 - 06/19, Open Source Project):

- A skill for the Mycroft Core's skill repo, created in Python
- For freelancers and individuals that want to manage their time spent on tasks/activities

Hipposcraper - Project Automation (10/18 - 06/19, Personal Project):

- Developed a Python webscraper script that automates Holberton's curriculum
- Used by many students in the Holberton community

EXPERIENCE

Contract Software Engineer - Fexy Media. San Francisco, 06/19 - Present

Deploy updated features and troubleshooting issues.

Full-Stack Software Engineer Student - Holberton. San Francisco, 09/18 - 9/20

Project based and peer-to-peer learning. Curriculum consists of: programming fundamentals, algorithms, data structures, time and space complexity, general Full-Stack knowledge.

EDUCATION

Holberton, 2018-2020.

Full-Stack Software Engineer

San Jose State University, 2014.

Graphic Design

HOBBIES

Programming, Linux, Self-study, Video Editing, Graphic Design
